

AN ASSET THAT WORKS FOR YOU, 365 DAYS A YEAR

The coffee that pays for itself.

The Neo Kiosk Sun Café® is not just another vending machine: it's an energy-self-sufficient point of sale that installs where no one else can go — and generates revenue from the very first coffee.

THE OPPORTUNITY

Where the grid stops, your revenue begins.

France has over 600,000 vending machines — almost all of them shut indoors, tied to a power socket. The whole of the outdoors is still untapped: beaches, ports, snow fronts, rest areas, worksites, village squares. The Sun Café® is today the only machine able to operate these locations. **The first movers take the best spots.**

WHO THE SUN CAFÉ® IS FOR

- 1 You're looking for extra income**
Investor, self-employed, future retiree: a return higher than a conventional investment, managed from your smartphone, paid off in under a year.
- 2 You manage a high-traffic site**
Campsite, resort, port, leisure park: a 24/7 coffee service for your visitors, with no works and no staff — plus extra income on top.
- 3 You want to fill a gap**
Town with no café, business park, worksite: an instant coffee point where there is no operator, no premises and no power grid.
- 4 You stand for values**
Local authority, company, tech park: zero CO₂ in use and wheelchair accessibility — a world first, visible and tangible.

A playing field no one is using

With no electricity or utilities nearby, the range of possible locations suddenly widens:

Campsites & outdoors Beaches & riverbanks Ports & promenades Ski resorts & snow fronts
Festivals & events Rest areas & truck stops Business parks & worksites Village centres
Campuses & forecourts

How much does it earn?

No electricity bill, no network subscription: every coffee served is almost pure revenue. Assumptions: coffee sold at €1.50, consumables cost €0.35/cup, 360 days a year.

6 to 10 months

TO PAY OFF THE MACHINE

≈ €12,400

GROSS MARGIN / YEAR AT 30
COFFEES/DAY

Scenario	Gross margin / month	Gross margin / year	Paid off in
25 coffees/day — cautious	≈ €863	≈ €10,350	≈ 9.8 months
30 coffees/day — median	≈ €1,035	≈ €12,420	≈ 8.2 months
40 coffees/day — active	≈ €1,380	≈ €16,560	≈ 6.2 months

The cost of doing nothing: a busy location with no coffee point earns nothing — neither for you nor for your visitors. Every season that passes without a kiosk is revenue that won't come back. Zero electricity bill, zero network subscription: the energy is produced by the machine itself.

Turnkey solution — machine + platform + starter kit + support

€8,490 excl. VAT

Leasing available — a monthly payment of ~€210/month over 48 months, covered by ~6 coffees a day — positive cash flow from month one.

Gross margin = revenue minus consumables (beans, cups, payment). Indicative figures, excluding restocking, financing, maintenance, insurance and any location fee. Actual profitability depends on your location: that is exactly what the free, tailored study we prepare for your site is for.

WHAT MAKES IT POSSIBLE — AND WORRY-FREE

Real coffee, zero hassle.

* Energy self-sufficient

Bifacial solar + wind turbine (2.5 kWp) and a 5 kWh battery:
4 days with no sun or wind. No connection, no outage.

☕ Bar-quality

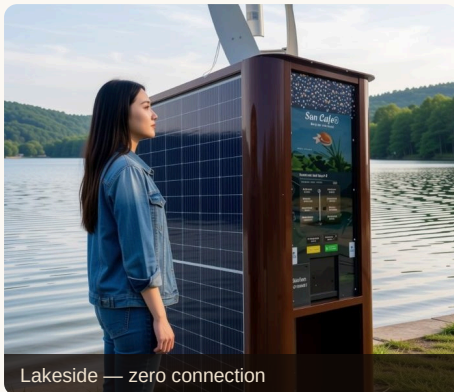

Fresh beans ground on demand, 8 drinks, zero pods. The coffee that sweeps away the "vending machine" prejudice.

📱 Managed from your pocket

Real-time sales and levels: you only travel when it's worth it.
Contactless payment, straight to your account.

🔒 Secure & mobile

Invisible anchoring, alarm and anti-lift detection, unbreakable front. And relocated in minutes to follow the seasons.

Let's go from idea to first coffee.

We support you from the first kiosk to fleet management. Three simple steps, no commitment:

1

Your **tailored profitability study**, calculated for your location — reply within 48 h.

2

The **demonstration**: at the Pont-de-Claix showroom (coffee on us) or by video call, live in front of the machine.

3

Your **first kiosk** installed, managed from your smartphone.
